# PLANTSAIN

ORGANIC FERTILIZER ENRICHED  
WITH TRICHODERMA EXTRACTS

100%  
ECOLOGICAL

PLANTSAIN is an innovative product resulting from plant physiology research.

Its *Trichoderma harzianum* extracts based-formulation penetrates deep down into the vessels : it allows sap fluidizing which prevents obstruction formation and congestion of vessels with pathogens.

In addition, PLANTSAIN optimizes plant nutrition by providing beneficial nutrients (Iron, Copper, Manganese, other Oligoelements...).

All these actions allow optimal growth, directing it towards root development and encouraging an increase of fruit filling yield.

## Utilisation

Foliar application :  
spray

Culture start : 25 l/ha  
(disinfection)  
then 5 to 10 l/ha every month

## Composition

*Trichoderma harzianum*-  
extracted natural flavours : 4%  
Bore (B) : 3%  
Zinc (Zn) : 1,6%  
Cuivre (Cu) : 3%  
Fer (Fe) : 3%  
Orange natural extracts : 1%  
Manganese (Mn) : 0,8%

Consistent with foliar  
fertilizer standards - NFU  
42-003-2  
Accordance with regulation  
CE N°384/2007

## Packaging

1l, 5l or 10l cans

Product preservation :  
6° to +35° in a can  
Can be stored for 5 ans

Without any treatment  
gummosis obstructions appear  
(like cholesterol)

Plantsain dissolves gummosis  
obstructions.  
Plants regain their vitality.
