

SOLSAIN S

TRICHODERMA-ENRICHED
ORGANIC FERTILIZER

100%
ECOLOGICAL

➔ **TRIPLE ACTION FERTILIZER**
Fertilizer/ Bio-control / Bio-stimulant

➔ **PREVENTS PATHOGENIC MICROORGANISM
DEVELOPMENT**

➔ **STIMULATES ROOT GROWTH**

➔ **INDUCES STIMULATION OF NATURAL
DEFENCES**

SOLSAIN S

TRICHODERMA- ENRICHED
ORGANIC FERTILIZER

100%
ECOLOGICAL

SOLSAIN S is a fertilizer which improves plant and soil health, vitality and quality.

SOLSAIN contains *Trichoderma harzianum* spores which quickly colonize root environment by raising a physical barrier against pathogenic fungi such as *Rhizoctonia*, *Pythium*, *Sclerotinia* and other sclerotia fungi.

In addition SOLSAIN S stimulates root developpement by releasing growth hormones analogs and solubizing nutrients next the roots.

Finally, SOLSAIN active compounds induce a stimulation of plant natural defences.

SOLSAIN Solid formulation is particularly adapted to hot soils (organic matter rich soils)

Application

Burying
0,5 to 1 Tonne/ soil ha

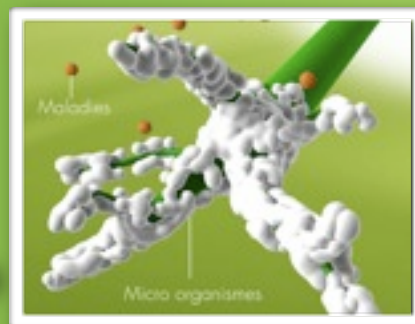

Composition

Trichoderma harzianum :
5.10⁸ spores/ml
Organic Matter : 46%
P205 : 0,5%
Organic N : 1,2%
K20 : 0,7%
C/N : 17

Consistent with standard
foliar fertilizer - NFU 42-003-2
Accordance with regulation
CE N°384/2007

Packing

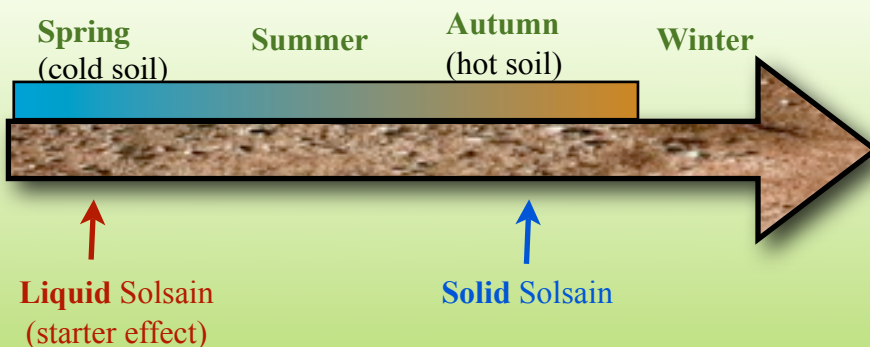

25 kg Bag
500 kg Big Bag

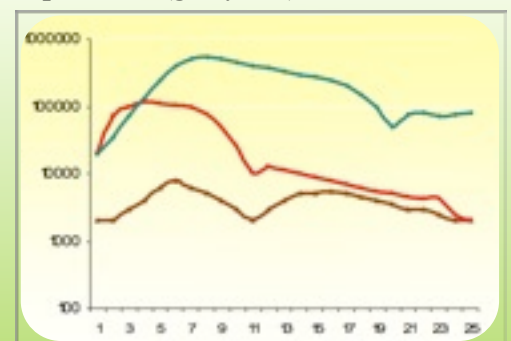

Trichoderma harzianum
spores colonize the
rhizosphere

Burying of SolSain S :
Trichoderma spores
mutiplicate

The two different formulations (solid et liquid) allow the product efficiency to be maximised all along the year (hot soils and cold soils).

Spores Nb (g/dry soil)

Time (months)
